TIMELESS ELEGANCE AND IMPRESSIVE DYNAMICS... THE F1 FLAT PANEL SPEAKER SYSTEM FROM CONCRETE AUDIO IS A PIECE OF WALL-MOUNTED ART.

## CONCRETE ART

ANCHORED BY: DEEPTA NAIR, PHOTOGRAPHS COURTESY ANUSHKA TECHNOVISION PVT LTD

THE F1 FLAT PANEL SPEAKER SYSTEM IS DEFINITELY A PRODUCT which Concrete Audio, the audiophile mavericks from Germany can boast about. The company is well known for introducing products where each individual piece is worked on until it meets the highest quality requirements. What makes the F1 Flat Panel Speaker System extra special? The model combines an ultra-flat concrete body with the patented array technique to form an innovative speaker system. Here, 41 electrodynamic mini-speakers act like one large membrane, allowing for a total depth of only 32 millimeters and giving a convincing performance. The enclosure of the speaker is made of special high-strength concrete — this material reliably prevents vibrations of the enclosure. The concrete curing process makes each piece a unique one — identical in shape and surface quality, but distinctive in terms of grain. With a design

that is reduced to the essential, this loudspeaker can be hidden, or be an eye-catcher, and therefore, harmonizes with various interiors. It is simple to install and operate, and can be placed, just like a picture — directly on the wall — and can be connected wireless, and via cable. And if you are one of those who don't like the stark concrete look, then there is an array of wide colours and surface finishes to choose from too. One can also combine the speaker with aluminum or real wooden frames; or add a reversible cover with individual motif. Concrete Audio speakers are exclusively available with New Delhi-based Anusha Technovision Pvt Ltd in India.
