

# The Claridges Embraces Smart Lighting

**The Claridges, New Delhi** is one of the best-known hotels located in the heart of Lutyen's Delhi. The Anusha Technovision Pvt. Ltd. (ATPL) team conceived a comprehensive automation system. It was aimed at fulfilling the client's need of adding convenience and exclusivity. The objective was to put all the lights under lighting controls and the required effect were to be made available

with the dimming of the lights.

In order to save energy, the room system was linked to the room thermostat along with lighting while presence detector was used to turn on the correct state of illumination in presence or absence of the guest in the room. The Do Not Disturb (DND) function and the Housekeeping mode were also designed to be activated

from the same keypad. When DND is activated, the doorbell is disabled and the DND sign on the outside keypad is highlighted. A single keypad by the side of the bed for lighting, shades and the DND functionality further reduces wall clutter.

## About ATPL:

Anusha Technovision Pvt. Ltd. (ATPL), the

**The Controls Used:**

Motorized shading systems have been installed that can be controlled from a single keypad with programmable timers raising and lowering your blinds and shades at the perfect hours during the day.

In order to add to convenience, custom-engraved and backlit keypads were placed near the bed side and also near the entrance. An innovation adopted was the absence of the Key Card.

The Room Automation System was designed to detect guest presence and absence for the system to act accordingly.

brainchild of Alok Hada, B.E. (Electronics), MBA (USA); has been in to the business of lighting controls & automation solutions for hotels, residences, corporate offices, retail stores, studios and multiplexes from over 14 years when it first started as India distributor for Lutron Lighting Control Systems (USA) and Crestron Automation Systems (USA). Based in New Delhi, ATPL with its offices in Mumbai and Bengaluru integrates various systems to enable a single point of control to the end-user in homes, offices and hotels throughout the country. ATPL now provides complete solutions for lighting controls, audio & video solutions and security & home automation to cater to the specific needs of its more than 200 clients across the country.
