# The Science of Sound

All of us want great sound at home. Ugly, oddly shaped speakers, have been the bane of many an aesthete's existence. The good news is that if you are willing to pay the price, this is now a thing of the past. Case in point, the beautifully hand-crafted omni directional ceramic speakers (above) from NAC Sound, Italy. The mechanical resonance is reduced for rich, natural, consistent sound. The ceramic material used to craft them has excellent acoustic properties. These high-end speakers have been brought to India by Anusha Technovision.
